SUMMARY

FullStack Software Developer with real-world experience building and deploying web apps using React, Node.js, PostgreSQL, and MongoDB. Trained through Andela's ATLP program and an internship at Toast Group, and recently graduated with a degree in Software Engineering from African Leadership University. I specialize in building clean, scalable applications, automating development workflows, and contributing to agile teams that ship fast and ship well

EDUCATION

Bachelor's Degree in Software Engineering

Full-Stack Development Specialization

African Leadership University(ALU) - Kigali, Rwanda

Graduated June 2025

WORK EXPERIENCE

Full-Stack Software developer

Andela(Remote - Fulltime)

Feb 2024 - Nov 2024

- Built and deployed full-stack apps using React, Node.js, Express, MongoDB, and PostgreSQL
- Led a team of 8 developers using Agile practices; improved collaboration and delivery speed
- Designed REST APIs, developed responsive UIs, and handled backend logic and auth flows
- Set up CI/CD pipelines with GitHub Actions and containerized apps using Docker
- Wrote unit tests (Jest, Vitest), documented APIs (Swagger/Postman), and reviewed 25+ PRs
- Collaborated using Trello, Figma, Slack, and GitHub throughout project lifecycles

Web Developer Intern

Toast Group(Kigali-fulltime)

Sept 2023 - Dec 2023

- Participated in a structured internship program focused on web development fundamentals
- Completed real tasks on in-house PHP-based systems while learning front-end basics
- Tutored and supported beginner learners through project guidance and Q&A sessions
- Gained foundational experience in HTML, CSS, and PHP through hands-on practice
